

How to submit videos with StoryTap:

1. You will receive your link via email and be directed to click on the link as it will take you to your appropriate guide to begin recording.
2. Once you are signed into the platform, you will have the option of giving your story a unique title by clicking the “name your story” tab.
3. After naming your story, a guide with prompts will pop up. Take a minute to get familiar with what’s to come by reviewing the prompts and unclicking any prompts that you do not wish to answer while filming.
4. If you are ready, hit record and begin filming your story. A dialogue box prompting you to “Download Shockwaveplayer” will pop up. Please click “allow and remember” in the dialogue box in the left-hand corner of your screen so that this box does not pop up continuously every time you hit record.

5. If you begin with a prompt and are unhappy with the result, you can click “manage” and begin re-recording as many times as you want.
6. You can choose to share with us or you can hit the “not now” button. By clicking “not now” you can choose to share your video privately with friends and family before it is with us. You can also choose to upload your video to your private Facebook account to get feedback from friends, family and associates worldwide if you’d like.
7. Once you have gotten your video to a place that you are satisfied with, please review and send it over to us for distribution.
